FY 2005 – Analysis and Description of Activities Funded through Section 251

Statewide Voter Registration System

The Wisconsin State Elections Board is continuing to make progress on the implementation of its Statewide Voter Registration System (SVRS). The database and application are currently in operation in some Wisconsin municipalities. Unlike most states where elections and voter registration are managed by counties, Wisconsin has the additional challenge of implementing at the municipal level. Before January 1, 2006, only 309 out of 1,851 municipalities had an existing voter registration system. Now 1,512 municipalities are required to register voters for the first time

To address this challenge, the SVRS project is deploying the application across the state iteratively through twelve distinct regions. These regions, as seen on the accompanying materials, encompass multiple counties, municipalities, and voting age populations. The Statewide Voter Registration System is currently in operation in approximately 1/3 of Wisconsin's municipalities.

The deployment of the application includes the following activities:

- 309 Wisconsin municipalities had legacy systems from which data needed to be converted. Data from 96 of these municipalities has been converted.
- 1,542 Wisconsin municipalities had only manual voter registration records to convert. Records from 497 municipalities have been populated in SVRS.
- o Approximately 2,500 elections staff have attended a training course.
- o 593 municipalities are currently live with SVRS.

The Wisconsin State Elections Board is now focusing on assisting live Regions with the April election cycle. Following the April 4 statewide election, the State will begin deployment of the application to the remaining municipalities, with the goal of full implementation prior to the fall election cycle.

The State Elections Board is currently implementing data verification procedures associated with cross-referencing identification with the Wisconsin Department of Transportation and the Social Security Administration. Interface programs are currently undergoing testing and are anticipated to be operational in April 2006. The State Election Board has entered into all necessary data exchange agreements with the Wisconsin Department of Transportation and the Social Security Administration. The State Election Board has also entered into all necessary data exchange agreements with the Wisconsin Department of Corrections and the Wisconsin Department of Health and Family Services.

The primary impediment to having a fully operational SVRS is the failure of the vendor to provide an acceptable application in a timely manner. The State Elections Board staff has diligently tested the versions of the application submitted by the vendor and

ORIGINAL.

provide detailed direction on how the application needs to be improvised. The State Elections Board and local election officials are frustrated by the delay implementation of SVRS. However, we are determined to have a viable application in use for the fall 2006 election cycle.

ORIGINAL.

Accessible Voting Equipment

At this time, no Section 251 funds have been expended through the end of 2005 toward the acquisition of accessible voting equipment. The Wisconsin State Elections Board has approved three voting systems (AccuPoll, the AutoMARK with ES&S products and Vote-PAD) for use as accessible voting equipment. Three additional vendors (Diebold, Sequoia and Populex) are also in the approval process. These vendors are expected to be reviewed by the Board in March and April, 2006.

The State Elections Board has also distributed information to all municipal and county clerks describing the approved vendors, the process for acquiring approved voting equipment and the process for receiving reimbursement with HAVA funding for the accessible component for their voting system. Twenty-six of Wisconsin's seventy-two counties have expressed an interest in purchasing either the AutoMARK or Diebold equipment. Based upon discussion with municipal and county clerks, it is anticipated that most municipalities will have ordered an accessible component for their voting system by May 1, 2006, in order that these systems will be in place by the September 12, 2006 Partisan Primary. Elections Board staff will contact those municipalities that have not ordered voting systems by May 15, 2006 to determine what assistance can be provided or issues must be resolved.

We therefore expect that the majority of the HAVA Section 251 funds will be expended prior to September 12, 2006 as reimbursement to municipalities for the acquisition of replacement or accessible voting systems or components.
